

Safe Use Instruction Sheet (SUIS) for AIREX® T90 und AIREX® T92 Families

In line with Regulation (EC) No. 1907/2006 & GHS

Page 1 of 3

revised: January 30th, 2025
GM--SUIS-002

0. General information

According to the United Nations Globally Harmonized System of Classification and Labelling of Chemicals (GHS), GHS applies to pure substances and their dilute solutions and to mixtures. "Articles" as defined in the Hazard Communication Standard (29 CFR 1910.1200) of the Occupational Safety and Health Administration of the United States of America, or by similar definition, are outside the scope of the system.

Also, the European Regulation (ER) on Chemicals No. 1907/2006 (REACH) enforced on June 1st, 2007 does only require Material Safety Data Sheet (MSDS) for hazardous substances or preparations – not for articles.

All AIREX® products meet the definition of "Article" under the United Nations Globally Harmonized System of Classification and Labelling of Chemicals (GHS), the European Union (EU) Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) Standard, United States (US) Occupational Health and Safety Administration (OSHA) Hazard Communication Standard, Canadian Workplace Hazardous Materials Information System (WHMIS) Regulation and Australian Work Health and Safety (WHS) Regulation.

Therefore, under normal usage of the AIREX® products, no Material Safety Data Sheet (MSDS) is legally required.

To support our customers with additional data on safe handling and use instructions for our manufactured articles this *Safe Use Instruction Sheet* was created.

1. Identification of product / article and of the company

AIREX® T90 (end grain), its derived products AIREX® TK90 (flat grain in width) and AIREX® TL90 (flat grain lengthwise)

AIREX® T92 (end grain), its derived products AIREX® TK92 (flat grain in width) and AIREX® TL92 (flat grain lengthwise)

(T90.60, T90.100, T90.150, T90.210)
(TK90.60, TK90.100, TK90.150, TK90.210)
(TL90.60, TL90.100, TL90.150, TL90.210)

(T92.60, T92.80, T92.100, T92.110, T92.130, T92.150, T92.200, T92.230, T92.280)
(TK92.60, TK92.80, TK92.100, TK92.130, TK92.150, TK92.200)
(TL92.60, TL92.80, TL92.100, TL92.130, TL92.150, TL92.200)

Use of product / article: Core material in sandwich constructions

Company identification: Airex AG
5643 Sins, Switzerland
Tel +41 41 789 66 00

2. Hazards identification

AIREX® T90/TK90/TL90 and AIREX® T92/TK92/TL92 do not constitute any risk to public health and environment if it is used as intended.

Fine dust is produced while sawing, milling, grinding and sanding.

Molten product adheres to the skin and causes burns.

May contain residuals from physical blowing agent (hydrocarbons).

3. Composition / Information on ingredients

Rigid polymeric foam on the basis of Polyethylenterephthalate.

4. First aid measures

Inhalation of gases in case of fire: Move victim to fresh air and obtain medical attention.

Skin contact: Molten product on the skin should be cooled rapidly with cold water, but not pulled off. Obtain medical attention.

Eye contact: Flush with water if irritation develops.

Ingestion: No special measures required. Seek medical attention if symptoms develop.

Safe Use Instruction Sheet (SUIS) for AIREX® T90 und AIREX® T92 Families

In line with Regulation (EC) No. 1907/2006 & GHS

GM--SUIS-002

5.	Fire-fighting measures	
	<i>Specific hazards:</i>	Not classified as flammable but will burn. Toxic gases contain carbon monoxide (CO) and others.
	<i>Suitable extinguishing media:</i>	Foam, water spray, extinguishing powder, carbon dioxide.
	<i>Extinguishing media which must not be used:</i>	Direct water jet.
		Use respiratory protection independent of recirculated air.
6.	Accidental release measures	
		No special measures required.
7.	Handling and storage	
	<i>Handling:</i>	No special measures required. Avoid generation or accumulation of dusts. Take precautionary measures against static discharges. Earth all equipment.
	<i>Storage:</i>	Stow away from immediate and dangerous sources of ignition. Danger of electrostatic charges when stored in very dry areas.
8.	Exposure control / personal protection	
	<i>Exposure limit values:</i>	Not applicable.
	<i>Exposure controls:</i>	The use of gloves, protective goggles and dust masks and also the use of dust extraction equipment is recommended for sawing, milling, grinding and sanding. For thermoforming, the workplace should be continuously supplied with fresh air. Where necessary, a respiratory protection is recommended.
9.	Physical and chemical properties	
	<i>Physical state / form:</i>	Polymer foam sheet with visible cell structure.
	<i>Colour:</i>	White / green
	<i>Melting temperature:</i>	250 °C
	<i>Decomposition temperature</i>	> 340 °C
	<i>Flash ignition temperature</i>	370 °C DIN 51794
	<i>Density:</i>	60 - 320 kg/m ³ ISO 845
	<i>Solubility: Insoluble in:</i>	Water, sea water, acids, alkalis, aliphatic hydrocarbons
	<i>Soluble in:</i>	Aromatic hydrocarbons, ketones, chlorinated hydrocarbons
10.	Stability and reactivity	
	<i>General information:</i>	Stable under normal conditions
	<i>Conditions to avoid:</i>	Not applicable
	<i>Materials to avoid:</i>	Oxidising agents
	<i>Dangerous decomposition products:</i>	Carbon monoxide (CO), acetaldehyde, acidic gases
11.	Toxicological information	
	<i>Toxicological tests:</i>	Based on MSDS of base material producer
	<i>Experience with man:</i>	
	<i>Skin contact:</i>	Does not contain any materials which are known to stimulate allergic reactions. Grinding dust may cause irritation to people with sensitive skin.
	<i>Eye contact:</i>	Dust may cause irritation.
	<i>Inhalation:</i>	Dust may cause irritation of respiration tract.
	<i>Ingestion:</i>	Low toxicity, LD50 > 2000 mg/kg
