

DESCRIPTION

AIREX® TegraCore™ is a closed-cell, ductile thermoplastic polymer foam that combines outstanding retardant properties at low flammability, smoke, toxicity and heat release rate, along with high temperature resilience and excellent lightweight properties.

Additionally, very low moisture and resin absorption, thermo formability, damage tolerance and chemical resistance bundle to high performance combination.

AIREX® TegraCore™ is an exceptional thermal insulation foam or core material for use in lightweight composites applications that demand high fire retardant properties, for complex shapes in environmental demanding conditions.

CHARACTERISTICS

- Low total cost fabrication
- Exceeds FAR 25.853 requirements: nearly zero smoke evolution, easily passes OSU heat release test
- Processing temperature up to 180 °C (355 °F)
- Very low moisture absorption
- Excellent hot-wet performance
- Exceptional impact resistance (non-brittle failure mode)
- Very good chemical resistance against aerospace fluids
- Dimensional stability in flight conditions
- Easy CNC routing and thermoforming to complex shapes
- Thermoplastic & thermoset composites compatible
- Good sound and thermal insulation

APPLICATIONS

- **Aircraft and Aerospace:** Interiors, luggage bins, side walls, seat covers, galleys, monuments, edge fillers, trolleys, insulating panels
- **Defense:** Naval joiner work, radomes, antennas, ballistic spacers
- **Marine:** Fire retardant interiors, cladding
- **Railway:** Interiors, side skirts, roof panels
- **Industrial:** High temperature tooling, radomes, x-ray tables

PROCESSING

- Adhesive bonding
- Thermoformable
- Pre-preg processing (up to 180 °C, 355 °F)
- Hot press molding
- Thermoplastic processable
- Automated tape laying (ATL/CTL)
